

COUNTY ROAD AND EQUIPMENT REPORT

June 2023

We have continued to stay the course since the last month's update.

Crews are taking advantage of every minute available to grade the roads from end to end. We are pulling ditches and completing thorough blading jobs.

We are applying for a Mitigation Grant to fix the series of culverts which are falling through on Baker Lake Road

The federal grant funded project on Half Moon Road is close to complete. The asphalt has been laid and we are waiting for some shoulder work and stripes. We have received calls about the curves being paved too narrowly but they are 22' wide which is two feet wider than normal. The federal grant paid for 2" of asphalt, 20 feet wide, and they did extend the width on the curves.

Asphalt patch work is still in progress and should have already been completed. CK Asphalt was the bid winner. They are laying the patches with a lay-down machine for less than we can purchase the hot-mix and roll it out ourselves. They pulled off our county for a larger job and will return ASAP.

Crews are mowing. We are running the mowers every day to trim as much as possible.

This month will also be spent on focusing on the basics.
